PURPOSE

The extensive course on rheumatology is aimed to:

- Educate rheumatologists and practitioners from different fields
- Spread innovative approaches in treatment of rheumatic diseases
- Establish scientific connections among participants
- Introduce and promote APLAR in the South East Asia region
- Lay a foundation for the long-lasting relationship between the Vietnam Rheumatology Association and international experts.

Course description and scientific content

- News and modern approaches, diseases mechanisms, epidemiology, clinical manifestation and treatment of rheumatoid arthritis, spondyloarthritis and systemic lupus erythematosus will be considered during the course. Lectures will focus on new approach and advances in diagnosis and treatment.
- Themes:**
 1. Innovative treatment approaches for autoimmune rheumatic diseases;
 2. Advances in rheumatoid arthritis diagnosis and treatment;
 3. Advances in spondyloarthritis diagnosis and treatment.

SPEAKERS

The course will host international speakers who are APLAR's experts. Speakers are highly qualified and have great expertise in their fields. All of them are interested in modern view on epidemiology, pathogenesis, diagnostic mechanisms and treatment of rheumatic diseases, as well as rheumatology system management and intervention to the healthcare systems.
